<b>Office Action Summary</b>	<b>Application No.</b> 10/579,705	<b>Applicant(s)</b> CHRIST ET AL.	
	<b>Examiner</b> QUANG NGUYEN, Ph.D.	<b>Art Unit</b> 1633	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

Claims 1, 4-12, 15, 19-36, 38 and 42-44 are pending in the present application, and they are subjected to the following restrictions.

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1, 4-12, 15, 19-23, 25-36, 38 and 42-44, drawn to an *in vivo* method of regulating smooth muscle tone in a subject.

Group II, claim 24, drawn to a method of regulating smooth muscle tone in a subject comprising the steps of transfecting cells *ex vivo* and transplanting the transfected cells into the subject.

The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The *in vivo* method of Group I does not require the steps of transfecting cells *ex vivo* and transplanting the transfected cells back into the subject as required by the method of Group II. Please note that each different method step can be considered to be a "special technical feature"; and therefore the methods listed as Groups I-II lack the same or corresponding special technical features.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17 (h).

***Species restriction:***

**Should Applicants elect either Group I or Group II,** this application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Different restricted groups of species are as follows:

1. **A single specific smooth muscle cell recited in the Markush group of claim 6.**
2. **A single specific potassium channel protein recited in the Markush group of claim 10 or claim 36.**
3. **A single specific introduced method recited in the Markush group of claim 19.**

**4.     A single specific dysfunction recited in the Markush group of claim 27.**

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The species within each restricted groups 1-4 listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species within each restricted groups 1-4 lack the same or corresponding special technical features for the following reasons:

Each of the aforementioned species within each restricted groups 1-4 is different at least structurally, chemically and/or has different properties one from the others. Therefore, each different structure can be considered to be a “special technical feature”; and therefore the listed species lack the same or corresponding special technical features.

Patent applicants with problems or questions regarding electronic images that can be viewed in the Patent Application Information Retrieval system (PAIR) can now contact the USPTO's Patent Electronic Business Center (Patent EBC) for assistance. Representatives are available to answer your questions daily from 6 am to midnight (EST). The toll free number is (866) 217-9197. When calling please have your application serial or patent number, the type of document you are having an image problem with, the number of pages and the specific nature of the problem. The Patent Electronic Business Center will notify applicants of the resolution of the problem within 5-7 business days. Applicants can also check PAIR to confirm that the problem has been corrected. The USPTO's Patent Electronic Business Center is a complete service center supporting all patent business on the Internet. The USPTO's PAIR system provides Internet-based access to patent application status and history information. It also enables applicants to view the scanned images of their own application file folder(s) as well as general patent information available to the public.
